Golden Wattle Sprig - fringed puff heads

Sprig 300 mm - puff heads 40 mm and 30 mm - 45-60 min - Intermediate

Australia's golden wattle: seven scalloped puff heads fringed and domed into fuzzy gold balls, with slim phyllode leaves on two paper stems. The signature filler for native arrangements.

EVERY PIECE ON ONE 12 x 12 IN MAT

15 cut pieces, 22 score lines - shown at 28%

CARDSTOCK KEY

Sage cardstock	#BCCBAE
Deep sage cardstock	#A6B998
Olive cardstock	#9FB08F

CUT SETTINGS

Fine-point blade on Cardstock 65 lb, More pressure, StandardGrip 12 x 12 in mat. The dashed grey paths are scores - set their linetype before cutting.

FILES IN THIS KIT

wattle-sprig.svg

Cut sheet: 15 pieces on one 305 mm mat.

wattle-sprig-score.svg

Score guides only, in the same positions - pair it with the cut sheet.

wattle-sprig-assembly.pdf

This three-page guide.

IN DESIGN SPACE

1. Upload both SVGs and keep them at 12 in - never resize one of the pair.
2. Select everything, then Attach, so each score lands on its piece.
3. Set the dashed paths to Linetype > Score, then cut on Cardstock 65 lb.

MATERIALS

- 65 lb (176 gsm) cardstock - gold, 1 sheet
- 65 lb cardstock - sage, 1 sheet
- 20 ga floral wire, two 300 mm stems
- Floral tape, 12 mm - green
- Tacky glue

TOOLS

- Fine-point blade
- StandardGrip 12 x 12 mat
- Small sharp scissors (fringing)
- Spatula and tweezers
- Pencil or fingertip for doming

Shaping guide

Shape the paper before any glue goes on. Once the fibres are broken, the piece holds its curve.

PIECES ON THE MAT

Sprig stem	x2	Phyllode short	x3
Phyllode long	x3	Puff head	x7

HANDS ON

1

Fringe

Cut fine slits from the scalloped edge toward the centre, stopping about 6 mm short - the denser the fringe, the fluffier the head.

2

Dome

Press the centre over a fingertip and work the fringe upward so the disc becomes a ball, not a saucer.

3

Gather

Cluster the heads in twos and threes at the stem tip rather than in a straight line - wattle grows in bursts.

LAYER ORDER - BOTTOM TO TOP

2 Phyllodes x6, stems x2

1 Puff heads x7 (fringed + domed)

Glue each layer onto the one below it, offsetting the joins so no two meet at the same point.

Assembly

Work in order - every step assumes the one before it.

1. Cut the seven discs and fringe each one with fine scissors, cutting toward the centre and stopping 6 mm short.
2. Dome every disc over a fingertip and tack the rim so it holds its ball shape.
3. Wrap both stems with green floral tape from the tip down.
4. Glue three puff heads to the tip of the first stem and four to the second, in loose clusters.
5. Tape the six phyllode leaves down the stems in pairs, longest pair nearest the heads.
6. Fluff the fringes outward once the glue sets - the heads should read as fuzzy gold balls.

FINISHING & CARE

- Dust with a soft brush or a hairdryer on cool.
- Keep out of direct sun - dyed cardstock fades.
- Paper is flammable: never place a bloom near a flame.
- Store stems flat or upright in a vase, never folded.

FINISHING

Trim any whiskers of glue with small scissors. A light dusting of chalk or ink on the petal edges deepens the colour and hides score marks. Keep finished pieces in a box, not a bag, so the petals hold their cup.

IF SOMETHING GOES WRONG

Heads looking flat? The fringing stopped too far out - slits need to reach within 6 mm of the centre for the dome to hold.

PRESENTATION & PACKAGING

- Stems: 18 ga wire carries a rose or peony head; step down to 20 ga where you want the neck to bend.
- Vases: weight the base with sand or glass beads - a paper bouquet is top heavy and will tip.
- Shipping and storage: box with tissue, never a sealed bag, or the petals crush flat.

BEFORE YOU CUT

- Piece count: 15 shapes on the mat - count them on screen first.
- Score lines: 22 dashed paths, each sitting on a piece.
- Size: the mat imports at 12 x 12 in - do not scale a single piece.
- Material: cardstock 65 lb. Heavier stock will not cup cleanly.
